

# Orga Systems.

#1 choice for real-time charging and billing

**Give Me Money**  
Simplified High Speed Top-Up

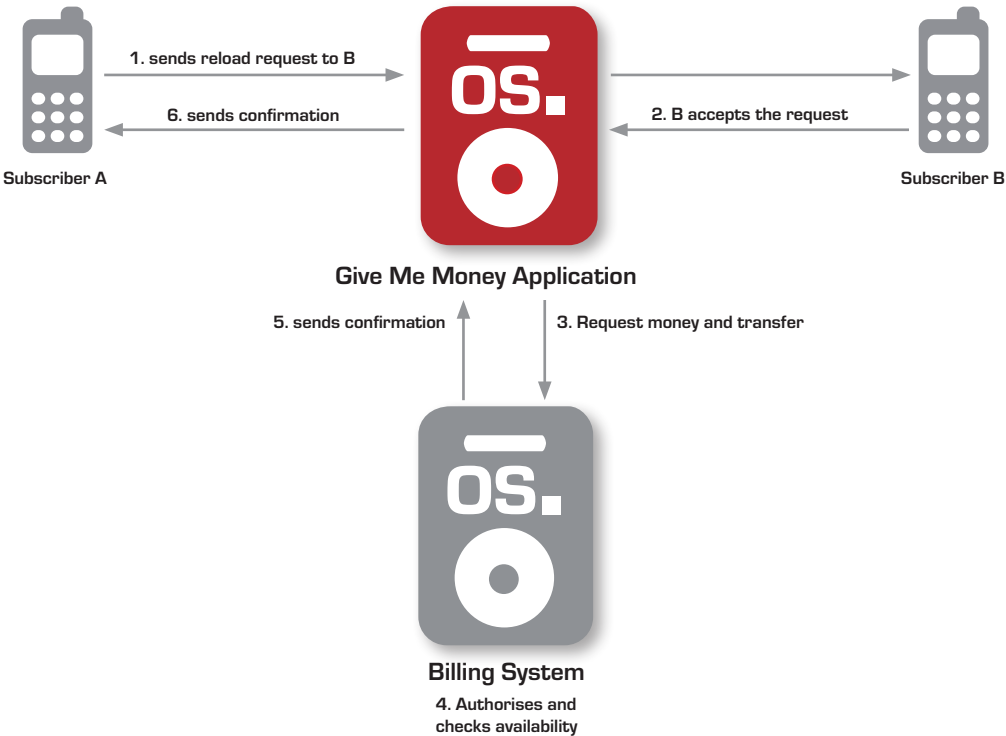

Orga Systems' Give Me Money enables operators to keep their prepaid customers online by enabling them to request top-ups from others. The solution allows prepaid customers to easily request a reload for their account from other subscribers of the operator's network.

A simplified and faster top-up procedure not only reduces no-credit periods, it increases traffic as well. The person receiving the request can either accept or deny the transfer. This way the system provides end-to-end security and accuracy.

**The Challenge**

Prepaid accounts provide a high level of convenience and flexibility to subscribers. However, because they have to be paid in advance there is always the risk of running out of funds. Also, pa-

rents may wish to manage the amount of money their children spend on their mobile phones. Even small companies may use a prepaid service for employees, and may wish to manage these costs.

## \_\_\_ The Solution

The Give Me Money solution provides a service for subscribers which allows them to request funds from other subscribers on the operator's network.

The person receiving the request can either accept or deny the transfer. The system provides end-to-end security and accuracy.

- Reduced no-credit period for prepaid subscribers and therefore increased traffic
- Easy integration in existing customer care environment
- Flexible combination with special promotions for families and friends
- Outstanding differentiation feature for gaining and retaining prepaid customers
