

Orga Systems.

#1 choice for real-time charging and billing

OVSC - Voucher Service Center
Reliable Voucher Management

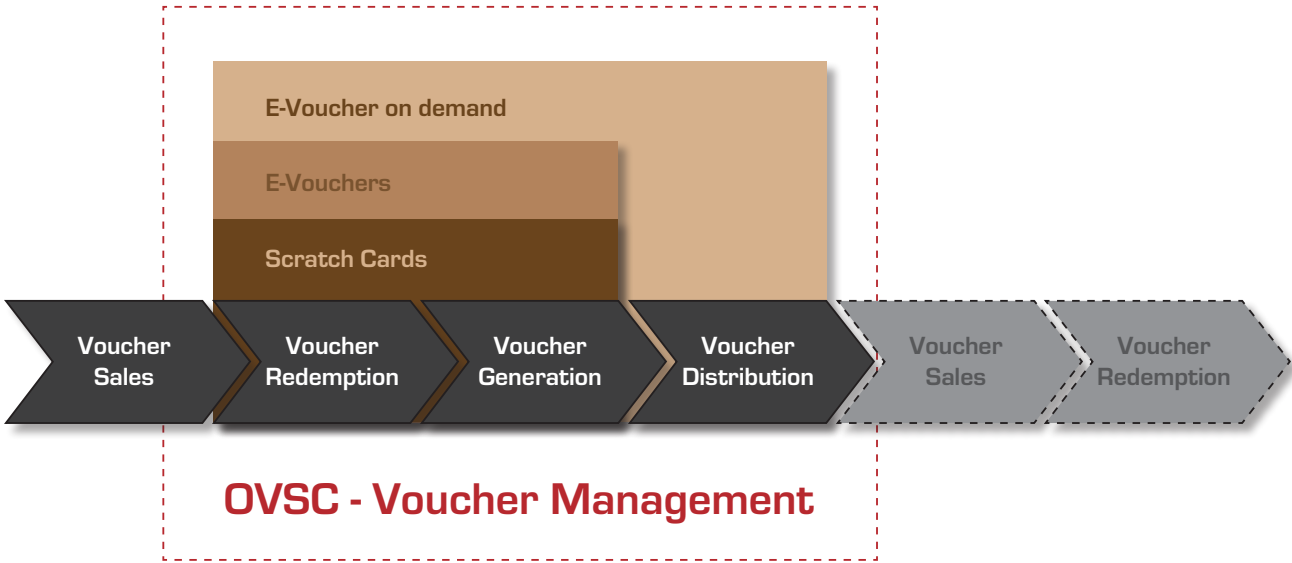

Orga Systems' Orga Voucher Service Center (OVSC) offers operators a reliable voucher management system that creates, manages and transfers voucher information for prepaid services in mobile telecommunication.

The various interfaces allow an easy integration of OVSC with prepaid billing systems and voucher printing and distribution systems.

— The Challenge

Prepaid services accelerate growth in today's telecoms markets. To secure prepaid revenues for the future, mobile operators need reliable and highly scalable voucher management solutions.

In order to enable high speed reloads during peak periods, voucher management has to meet highest performance requirements.

The Solution

OVSC is a high-performance voucher management system. It flexibly handles all necessary operations within the voucher-lifecycle.

In the process of producing scratch cards, e-vouchers and printed receipts, OVSC manages the entire voucher data generation process. It generates print files which include batches of serial numbers and associated secret codes. Once vouchers have been distributed to the point of sale, Orga Systems' Voucher Service Center securely activates the delivered batches. Voucher batches that are reported as lost or stolen can be barred instantly.

In addition to the mass production of voucher codes for scratch cards, OVSC can generate single voucher codes with fixed or flexible denomination values on demand. OVSC's enhanced promotion

capabilities enable telecom operators to boost voucher based recharge with specific voucher types: Gift vouchers as bonuses for an extra recharge or exclusive vouchers to run dedicated marketing campaigns for selected customer segments.

Accompanied by an easy to handle Voucher Care Client, OVSC offers communication service providers a convenient user interface for all customer-care related voucher management and control activities.

In combination with Orga Systems' real-time billing platforms OPSC® Prepaid and OPSC® Gold, OVSC can be implemented to provide a powerful and profitable solution package for mobile network operators.

Your Benefits

- Highly secure and fast voucher creation
- Flexible support for marketing promotions
- Cost efficient usage-based license model
- Convenient system administration
- High performance InCore® In-Memory database
