

— OS.CASH —

Making Money Mobile, Secure and Accessible – Anytime and Anywhere

Benefits

- Convenient and menu driven cash-in/cash-out handling
- Supports various access channels and technologies
- Automatic confirmation processing in real time
- Highest transparency of cash-flow for operators and cash agents
- Provides access to new customers and generates additional revenue

— The number of people who do not
— have access to a bank account but to
— a mobile phone is estimated to be over
— 1 billion. OS.Cash closes the gap be-
5 — tween the banked and the unbanked
— world. It enables every registered
— customer to save money and to with-
— draw it from a personal mobile money
— account. OS.Cash facilitates the com-
10 — plete cash-in/cash-out process and
— mobile money account management.

OS.Cash offers a convenient and menu driven cash-in/cash-out handling to the customer and to the cash agents who credit or debit the mobile money account. It supports various access channels and technologies. Customers can also cash out money via self-care at a bank ATM. This enables to withdraw cash from a mobile money account without the need to have a money agent or merchant involved. All transactions, including notification messages and the adjustment of mobile money account balances, are processed in real time.

OS. MONEY

Orga Systems' SmartMoney Suite™ enables telecom operators and financial institutions to offer advanced mobile payment and financial services. It provides a secure and easy way to launch new services and enhanced support for the complete mobile money agent and distribution network daily management. The SmartMoney Suite™ creates an excellent end-user experience through attractive services - including money transfer, mobile payments, cash-in/cash-out, bill payment and prepaid top-up.

In addition, it ensures simple usage, security and highest availability. This supports communication service providers and financial institutions to boost customer retention and revenue growth.
