

— OS. VOUCHER —

Voucher, Sales and Distribution Management in Real Time

Benefits

- Highly secure and fast voucher creation
- Supports multiple prepaid market needs
- Powerful marketing tool
- Easy integration into existing network environment
- Certified fraud protection
- High performance and scalability

— OS.Voucher is Orga Systems' recharge solution for any market need, geographical region and system environment. It manages the whole voucher-lifecycle and the distribution and sales channels in a secure and flexible manner for voucher-based and voucherless top-ups.

5 — OS.Voucher handles the entire process of mass production of voucher codes for scratch cards and e-vouchers, including serial numbers and associated secret codes as well as voucherless airtime selling. It supports a hierarchical network of distributors and retailers, and it provides comprehensive functionality for all aspects of sales and channel management in real time. All kinds of distribution channels and technologies such as mobile handsets, USSD, IVR, cash registries, POS terminals, ATMs and web clients are supported.

With OS.Voucher, operators can rely on a powerful marketing tool. Vouchers dedicated to top-up promotions or special recharge bonuses enable segmented marketing campaigns and boost revenues.

Open interfaces guarantee easy integration with BSS environments and voucher printing systems from different vendors. OS.Voucher meets highest performance requirements enabling high speed reloads during peak periods.

PREPAID

OS. REVENUE

Orga Systems' SmartRevenue Suite™ for convergent real-time charging, billing and financial management offers a range of outstanding solution propositions as well as various deployment options. It provides leading real-time capabilities for all: prepaid, postpaid, hybrid and corporate subscribers. Real-time charging, policy management and bill shock prevention are inherent components and can be provided without redundant subscriber data management.

On top of this, the SmartRevenue Suite™ provides excellent marketing and customer retention functionalities, as well as outstanding scalability and industry leading real-time performance.
